PROFILE

Motivated Bachelor of Science in Information Technology student with practical experience in software development, web applications, database management, and data analysis through academic and personal projects. Seeking an OJT/internship opportunity to apply programming, analytical thinking, and problem-solving skills in developing software solutions and transforming data into meaningful insights while gaining professional industry experience.

EDUCATION

Divine Word College of Calapan | 2023 — Present

Bachelor of Science in Information Technology

ACADEMIC EXPERIENCE

Software Development & Data Analysis | 2025 – Present
Divine Word College of Calapan — Academic Coursework & Project

- Developed web-based applications using programming, database management, and software development principles.
- Applied SQL, data visualization, and analytical techniques to organize and interpret data.
- Collaborated on academic projects involving system design, testing, and technical documentation.

PROJECTS

BANTAY — Epidemiological Surveillance & Decision Support System | Jul 2026 — Present

- Collaborated in designing a web-based disease surveillance system for the Calapan City Health Office, incorporating automated data validation, interactive dashboards, disease trend analysis, geographic monitoring, and rule-based alerts to support public health decision-making.

GastosWise — Web-Based Personal Finance Management System | Apr 2026 — Present

- Developed and deployed a web-based financial management system featuring income and expense tracking, budget monitoring, data visualization, and exportable financial reports, enabling users to analyze spending patterns and make informed financial decisions.

Sampaguita Senior Care Management System | Dec 2025

- Developed and deployed a web-based financial management system featuring income and expense tracking, budget monitoring, data visualization, and exportable financial reports, enabling users to analyze spending patterns and make informed financial decisions.

SKILLS

Data Analysis & Visualization: Power BI, Tableau, Advanced Excel, Data Modeling, AI/ML Concepts
Databases & Querying: SQL, MySQL, PostgreSQL, MariaDB, Relational Database Design.
Programming Languages: Python, Java, C#, C++, JavaScript, PHP, HTML, CSS.
Web & App Development: Laravel, Next.js, ASP.NET, REST APIs, API Integration
Tools & Methodologies: Git/GitHub, VS Code, Agile/Scrum.
